

FAST BLAST Freezer Doors

FROZEN IN TIME

SW Steelworks FAST BLAST Freezer Door, the only rolling product that has been specifically Designed and Manufactured for the Blast Cell Application. With 25 years in the door industry, we know the biggest problem with other freezer doors is frost build-up, which results in damage, very expensive loss of containment, inconsistent longer freeze times, maintenance, costly service calls and of course downtime. So we designed our patented **Frost Guard Brush System**. This simple but effective feature mechanically keeps the frost from building up on the panel. And it performs every time the door is in motion, and without the need to introduce massive amounts of heat onto the door and into the freezer.

Our **FAST BLAST Freezer Doors** provide reliable, SAFE operation in the most extreme environments, while rigid enough, to withstand the differential pressure of blast freezers. Providing consistency to your product freeze times.

SW Steelworks FAST BLAST Freezer Doors, the dependable, simple fix to the most critical and profitable part of your business.

Proven:

Reliable.
Safe.
Consistent.

Profitable.
Lower Freeze
Times.

Handles
Extreme
Environments.

SPECIFICATIONS

PROBLEM: Harsh environments and frigid temperatures are brutal to most door systems. These products develop ice buildup, adding immense weight to the door causing a real safety hazard, premature failure, costly repairs/downtime and cause increased freeze time of your product.

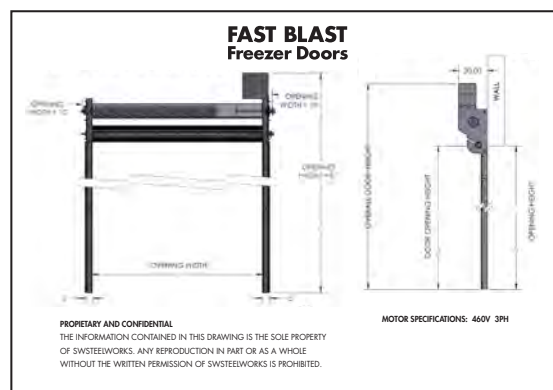

SOLUTION: SW Steelworks FAST BLAST Freezer Door

safe and consistent containment of your blast cell, DECREASING Freeze time.

Our Design provides reliable, SAFE operation, while utilizing a flexible, impact forgiving, yet still rigid, curtain.

Our **FAST BLAST** door provides you with a reliable, simple fix to the most critical and profitable part of your business, **Blast Freezing**.

DETAILS:

- Simple, Flexible, IMPACT Forgiving Curtain Design
- Unique Curtain Design withstands High Levels of +/- Differential Pressures.
- UHMW Windlocks keep the Curtain Secure in the guide.
- 6ft Additional Curtain Wrapped on the Barrel
- Sectional, Hinged Guides for Easy Repair and Access
- Exclusive Frost Guard Brush Bar System
- Power Operated as Standard
- Available with Self-Supporting Frame Designs for Applications with Limited Structure
- Standard Sizes up to 30'x30'
- Consult factory for larger sizes

“The Steelworks FAST BLAST Freezer Doors eliminated our maintenance problems, wish we had put them in sooner. Blast time was reduced and product in the blast reached zero quicker. The FAST BLAST doors are more practical and much safer than other doors.

Richard,
Cold Storage Manager
