

Dr. Coral Kirscher, DNP, FNP-C Whitney Lloyd, MSN, FNP-C

After experiencing firsthand the limitations of traditional medicine in her journey with an autoimmune disorder, fatigue, pain, neurological issues and microbiome dysfunction, Dr. Coral Kirscher, DNP, FNP-C realized many others are facing similar challenges. This realization led to the creation of Renew Specialty Group, dedicated to helping others overcome the same challenges she faced personally. Renew provides comprehensive care for both women and men. The goal is to empower patients to take control of their health because no one should suffer. Everyone deserves the chance to live a long, healthy and happy life.

Renew is a medical practice that combines traditional and natural approaches to achieve better outcomes for patients without resorting to surgery or toxic medication. Renew is dedicated to putting patients first and delivering results, focusing on natural and non-invasive, non-surgical options for patients, which significantly reduce pain levels, improve mobility and enhance quality of life.

Some of the services offered include medical weight loss, weight health management and help with weight loss resistance, anti-aging, natural aesthetics, NAD+, women's health, hormone replacement therapy, Sylfirm X microneedling RF, ReSculpt body contouring, hair restoration, functional medicine, IV therapy, men's health, TRT, male enhancement, Class 4 laser, PRP & PRF and pain management.

The goal at Renew is to empower you, the patient, with meaningful information, cutting edge research, alternative perspectives and a range of holistic options that offer you the tools you need to heal and feel well in your body, while at the same time, avoiding the potential side effects and risks of synthetic hormones, pharmaceutical medications and surgery.

Renew Specialty group is located in Cornelius on the corner of W. Catawba Ave. and Nantz Road, and offers complimentary consultations for most of their services. ■
