

Spanish for Middle and High School Students

Our personalized Spanish program is designed specifically to support middle and high school students in excelling at Spanish as a World Language subject. With most school districts and private schools offering Spanish courses ranging from novice to advanced levels, our focus is on reinforcing classroom learning to help students prepare for school tests and achieve success in their Spanish studies.

We provide individualized, one-on-one tutoring sessions to ensure personalized attention and effective learning. Classes are offered once a week on either Monday or Wednesday. For students seeking a more immersive experience, we also offer the option to attend twice a week.

***Placement and Proficiency**

To meet each student's specific needs, we begin with an initial interview and assessment. Based on this, we create a customized plan to target the areas identified for improvement. This tailored approach ensures that each student receives the right support for their language development.

***Year-Round Program**

Our Spanish Tutoring Program runs continuously throughout the year. Consistent practice and feedback are key to acquiring a language, so we encourage year-round participation for optimal language development. Our commitment to your student's success means providing continuous, high-quality instruction that aligns with their academic needs.

**Why Choose Us?*

Our curriculum aligns with the Texas Essential Knowledge and Skills (TEKS) for Languages Other Than English (LOTE). We use proven teaching methods, including hands-on activities, TPRS (Teaching Proficiency through Reading and Storytelling), and blended learning, to engage students in effective language acquisition.

Comprehensive Materials: A one-time \$60 educational materials fee is required at registration and when students advance to the next level. This fee covers the cost of new instructional materials and resources.

Learning a second language offers numerous cognitive benefits, including improved problem-solving skills and enhanced divergent thinking. Additionally, competitive colleges often require at least two years of foreign language study in high school. Our goal is to prepare students not just for academic success but for future opportunities as well.
